

# SEVERE WEATHER? TUNE IN!

NOAA Weather Radio

Do you have a battery-operated NOAA weather radio at your home or workplace?

If the NOAA broadcasts reach your area, the radios can be invaluable. Here's why:

- NOAA provides continuous broadcasts of the latest weather information directly from the National Weather Service offices. When severe weather threatens your area, the broadcast activates an alarm and turns on the radio so you can hear critical, potentially life-saving messages.
- NOAA weather radios can take advantage of an even greater tool: the "all hazards" radio network. These broadcasts provide warning and post-event information for a host of other threats including natural and technological hazards.
- NOAA weather radios can also receive broadcasted AMBER alerts for missing children.
- The NOAA weather radio network is expanding in coverage and capability, making it an invaluable tool. For as little as \$20, anyone can have access to potentially life-saving emergency messages.

We think your family's safety is worth the investment. Call your local electric cooperative or visit [www.nws.noaa.gov/nwr/index.html](http://www.nws.noaa.gov/nwr/index.html) for more weather radio information.
